CAAP Scores: DSU Students Compared to SD System and National User Norms

All degree-seeking students in the regental system must meet the minimum required score on each of the Collegiate Assessment of Academic Proficiency (CAAP) exams. Students who do not meet the minimum required score on one or more of the exams must remediate and retest in that area(s) within one year. During academic year 13-14, 14.5% of the DSU students did not meet the minimum score on one or more of the exams. On a system basis, 11% of the students required remediation in one or more areas. The 2013-2014 Board of Regents Proficiency Report is available at this link.

Percentage of Students Requiring Remediation by Proficiency Test and Cohort

The averages exclude students receiving special accommodations for testing. The system results for the 13-14 year will be published December 2014. The national user norms include data from four-year college sophomores.
